Experience

Buck

Web Developer

2011 – 2013

Implemented application for managing e-commerce storefronts using jQuery, C#, REST web services and SQL Server 2012. Solution allows merchants to create items, which can be purchased using mobile devices, tablets and PCs. It also allows merchants to view their business using reporting and analytics functionality, which can be viewed on any device with no compatibility restrictions.

Technologies: jQuery, JavaScript, ASP.NET, C#, HTML5, CSS3, REST web services, JSON, Photoshop

Cole & Weber United

Web Developer

2005 – 2011

Responsible for designing client web applications utilizing HTML, JavaScript, CSS, and C# in addition to incorporating database integration with SQL to create dynamic webpages. Going into this job, I had no prior knowledge of .NET, SQL or Visual Studio. I learned a great deal from co-workers at Cole & Weber.

Technologies: ASP.NET, C#, SQL, SOAP web services, HTML, CSS, JavaScript, jQuery, Photoshop, XML, XSL, JSON

WildSeed

Site Builder 2004
Built and maintained websites promoting WildSeed's products and services. I worked closely with the design team to create very precise, cross browser rendering of the designs.

Technologies: HTML, CSS, JavaScript, Photoshop

Church Partner
Site Builder 2001-2003
Designed, built and maintained the company's website which sold the organization's products to their customers. Integrated website with a shopping cart and payment processing solution.

Technologies: HTML, CSS, JavaScript, Photoshop

Education **Art Institute of Colorado**
AA in Web Administration 2000-2001

Learned HTML, CSS, JavaScript, Photoshop and Typography.
